Project Work

I have made some project with different skills two enhance my knowledge . I have been used different technologies on it like Tailwind css , Bootstrap, JavaScript and React js. But after making this all projects i lerant lot of things using this technology.

- **Tic Tac Toe** -- Tic tac Toe game is made in html,css and javascript. It was difficult to make for first time beacuse it used in core javascript and strong logic.
- **Calculator** -- It is a samll project that i have created using html , css and javascript. The main purpose of creating this calculator is to enhance logic build.
- **Digital & Alram Watch** -- Digital and Alram Watch is also one of the famous and difficult project for me beacuse it used agian core javascript concepts and implements the logics.
- **BMI Calculator** -- It is a samll project that i have created using html , css and javascript. The main purpose of creating this calculator is to enhance logic build.

Front-End Developer.

- A "frontend project" typically refers to a software development project that focuses on building the user interface (UI) and user experience (UX) of a software application. In the context of web development, this often involves creating the visual elements that users interact with directly in a web browser.
- Portfolio (HTML, CSS, js, Bootstraps)
- Currently Working on a Messaging App (Like WhatsApp)
